NQI #1 Neonatal Iatrogenic Pneumothorax Rate

DESCRIPTION

Iatrogenic pneumothorax cases (secondary diagnosis) per 1,000 discharges for neonates weighing 500 grams or more but less than 2,500 grams. Excludes normal newborns; cases with chest trauma, pleural effusion, thoracic surgery, lung or pleural biopsy, diaphragmatic surgery repair, or cardiac surgery; cases with a principal diagnosis of iatrogenic pneumothorax; and cases with a secondary diagnosis of iatrogenic pneumothorax present on admission.

[NOTE: The software provides the rate per hospital discharge. However, common practice reports the measure as per 1,000 discharges. The user must multiply the rate obtained from the software by 1,000 to report events per 1,000 hospital discharges.]
