AHRQ Quality Indicators™, Version 4.5a, July 2014
Area-Level Indicator
Type of Score: Rate

Description

Postoperative reclosures of the abdominal wall per 100,000 population, ages 18 years and older. Excludes cases with an immunocompromised state and obstetric cases.

[NOTE: The software provides the rate per population. However, common practice reports the measure as per 100,000 population. The user must multiply the rate obtained from the software by 100,000 to report events per 100,000 population.]
